Santa Rosa, California 95409

Subject: Access Agreement to Perform a Cone Penetrometer Test Boring and Install
Six Groundwater Monitoring Wells at 4420 Sonoma Highway, Santa Rosa, California.

Mr. Carillo:

At the request of Exxon Mobil Corporation (Exxon Mobil), Environmental Resolutions, Inc. (ERI) is requesting authorization to enter onto your property at 4420 Sonoma Highway, Santa Rosa, California, to perform a cone penetrometer test (CPT) boring (CPT7) and install six groundwater monitoring wells (MW10A, MW10B, MW10C, MW11A, MW11B, and MW11C) in association with ongoing environmental assessment activities at Former Exxon Service Station 7-3035, 4501 Sonoma Highway, Santa Rosa, California. This work is being performed in response to a directive from the California Regional Water Quality Control Board, North Coast Region (Regional Board).

ERI anticipates the CPT investigation will be complete in approximately one day. The test boring will be advanced to approximately 80 feet below ground surface (bgs). At an adjacent boring, a direct-push tool will be advanced to various groundwater depths for collection of groundwater samples. Upon completion of sampling, both borings will be grouted to the surface, and the surface will be finished to match the surrounding area.

ERI will evaluate the results of the CPT investigation and install the groundwater monitoring wells in a subsequent field event. ERI anticipates the installation of the groundwater monitoring wells will be completed in five days. The proposed well locations are shown on the attached map; however, the final placement of the wells may be altered to avoid conflicts with existing underground utilities. The wells will be installed in separate borings and will be set in 12-inch round well boxes with traffic-rated lids to protect them from traffic and surface water infiltration. Soil and water generated during these investigation activities will be stored at the former Exxon site pending characterization and disposal.

This access agreement will remain in effect to allow periodic monitoring and sampling of the wells for the duration of time necessary for Exxon Mobil to obtain case closure from the Regional Board for the investigation associated with the former Exxon site. When Exxon Mobil has obtained case closure from the Regional Board, the wells will be properly destroyed in accordance with the County of Sonoma Environmental Health Division (the County) regulations.

Copies of ERI's Workers' Compensation, General Liability Insurance, and Contractors License are attached. Please sign below if this agreement is acceptable and return one original to ERI. ERI and Exxon Mobil greatly appreciate your cooperation in this matter. ERI will coordinate the date and time of the field work with you or your designated representative.

August 3, 2005

Please contact Ms. Paula Sime, ERI's project manager for this site, at (707) 766-2026 with any questions regarding the work.

Sincerely,
Environmental Resolutions, Inc.
